What this standard covers

This standard specifies the production, construction requirements and quality standards of ethylene cracking furnaces and hydrogen conversion furnaces for petrochemical engineering. This standard is applicable to the production, construction and acceptance of box-shaped and tubular cracking furnaces for ethylene plants (hereinafter referred to as cracking furnaces) and box-shaped and tubular steam reformers for hydrogen production devices (hereinafter referred to as reformers) in petrochemical engineering.

Document data

International classification (ICS): 25.180.

Chinese classification (CCS): P72.

Estimated length of the Chinese original: 39,354 words.

Supersedes the earlier edition SH/T 3511-2007.
