What this standard covers

This standard specifies the construction technical requirements and quality acceptance standards for the installation of centrifugal compressor units, steam turbine installation, flue gas turbine installation, motor installation, auxiliary equipment and pipeline installation, unit test operation, etc. for petrochemical industry. This standard applies to the construction and acceptance of centrifugal compressor units driven by one or more types of electric motors, steam turbines or flue gas turbines in new construction, expansion, and transformation projects in petrochemical, coal chemical and natural gas chemical industries.

Document data

International classification (ICS): 75.180.

Chinese classification (CCS): P72.

Estimated length of the Chinese original: 60,695 words.

Supersedes the earlier edition SH/T 3539-2007.
