What this standard covers

This standard specifies the anti-corrosion coating, coating and acceptance requirements for the surface of steel shell-and-tube heat exchangers and air cooler tubes. This standard is applicable to anti-corrosion coating and coating on the inner and outer surfaces of tube bundles whose working temperature is not more than 300°C.

Document data

International classification (ICS): 25.220.

Chinese classification (CCS): P72.

Estimated length of the Chinese original: 18,172 words.

Supersedes the earlier edition SH/T 3540-2007.
