What this standard covers

This standard specifies the acceptance of materials for petrochemical vertical cylindrical cryogenic storage tanks, foundation and prestressed concrete outer tank construction, prefabricated installation of steel tanks and accessories, welding inspection, testing and thermal insulation engineering, and other quality acceptance standards and engineering delivery technology. Document requirements. This standard applies to the storage of boiling point 0°C ~ 165°C hydrocarbons or ammonia and other low-temperature liquid medium, the design pressure of not more than 50kPa single-capacity, double-capacity and full-capacity vertical cylindrical cryogenic storage tank construction quality acceptance .

Document data

International classification (ICS): 75.200.

Chinese classification (CCS): P72.

Estimated length of the Chinese original: 51,529 words.
