What this standard covers

This standard specifies the FCCU reactor regeneration system equipment factory manufacturing process, site welding process control construction technology and quality requirements. This standard applies to construction projects in petrochemical engineering construction, expansion and renovation projects FCCU reactor regeneration system equipment construction.

Document data

International classification (ICS): 75.180.99.

Chinese classification (CCS): P72.

Estimated length of the Chinese original: 32,349 words.
