What this standard covers

This standard applies to FU-104Z-power launch tube (hereinafter referred to as the tube). The rate of thorium tungsten cathode tube, evaporative cooling of the anode metal ceramic tetrode, rated anode dissipation power of 100 kilowatts, for fixed wireless devices as Class C or oscillation frequency amplifier, class AB linear amplification of high frequency, low frequency power amplification, modulation, modulation of the anode second gate (C) high-frequency amplification.

Document data

Chinese classification (CCS): L36.

Estimated length of the Chinese original: 10,168 words.
