What this standard covers

This standard specifies the military software development and documentation to develop uniform requirements. This standard will be used in the following four areas: 1. 2. 1 organizations and agreements. This standard can be used to Cheng Zhifang, engaged in software development of internal Cheng Zhifang or government agencies. For the sake of consistency, the term "demand side, " said the organization requesting this technical work, "the development side, " said the organization perform such technical work "Contract" means the agreement between these organizations' mission statement "(SOW) pointed out that the development side is a list of tasks to complete the "contract data Requirements list (CDRL)" refers to the list of products can be delivered using the software "sub Cheng Zhifang, " said their organization required to complete part of the task entrusted by the development side. "Software Development" is a generic term which includes the development of new software, put repair, reuse, re-engineering, maintenance, and all other activities generating software products. 1. 2. 2 Application Specific contract. It is the standard by reference in the contract and work. This standard can be used for each contract covering each type of software products and software (without regard to its storage media), applicable to the extent required under the contract. Examples include the type of software and non-delivery, in order to meet user needs and design software and engineering and software used in the test environment can be delivered. Demand side should describe the type of software, and each type of software uses the standard or appropriate crop this standard. If the case does not make this selective application instructions and a reference to this standard, it will be considered to complete all deliverables using the standard software. The demands on software development environment standard also applies to the deliverable software development environment. Although this standard is for total
