What this standard covers

This standard specifies the application of microwave frequencies gyromagnetic ferrite material (hereinafter referred to as materials) requirements, quality assurance provisions, delivery preparation. This standard applies to microwave ferrite devices use rotating magnetic polycrystalline ferrite materials. This specification does not apply to rotating magnetic ferrite film polycrystalline materials gyromagnetic monocrystalline ferrite materials.

Document data

Chinese classification (CCS): L19.

Estimated length of the Chinese original: 9,999 words.
