

**INDUSTRY STANDARD OF THE
PEOPLE'S REPUBLIC OF CHINA**

SJ 20855-2002

**General specification for wavelength division multiplexing fiber
communication systems**

波分复用光纤通信系统通用规范

(English Translation)

Issued on: December 12, 2002

Implemented on: May 1, 2003

Issued by: Ministry of Industry and Information Technology of PRC

What this standard covers

This standard specifies the optical fiber as a transmission medium WDM communication system (referred to as system or WDM system) requirements, quality assurance provisions, preparation and delivery instructions such matters. This standard applies to 2.5 Gb/s, 10 Gb/s rate is based on single-fiber single-point or military Bidirectional WDM optical communication system, carrying signals for the synchronous digital hierarchy (SDH), the largest digital channel 16 or 32, a single channel type: STM-16 or STM-64 (STM for the Synchronous Transport Module), carrying the signal to other formats or rate military WDM optical communication system can be implemented by reference.

Document data

Chinese classification (CCS): M33.

Estimated length of the Chinese original: 18,137 words.
