

**INDUSTRY STANDARD OF THE
PEOPLE'S REPUBLIC OF CHINA**

SJ 20915-2004

**General specification for 400Hz static frequency converter
power-supply**

400 Hz 静止变频电源通用规范

(English Translation)

Issued on: October 25, 2004

Implemented on: December 30, 2004

Issued by: Ministry of Industry and Information Technology of PRC

What this standard covers

This standard specifies the rated voltage of 220V single-phase and three-phase 220/380V, 50Hz rated frequency sinusoidal AC rated voltage is converted into 115V, 230V single-phase and 115/200V, 380V three-phase, rated frequency is 400Hz sinusoidal AC General requirements for static frequency converter. This specification refers to a variety of static frequency power electronic equipment used in the secondary power supply, including static inverter and static converters (hereinafter referred to as static inverter power supply). This specification also defines the rated voltage 28. 5V DC voltage is converted into a 115/200V single-phase and three-phase 115V, rated frequency is 400Hz sinusoidal AC inverter General requirements. Rated output phase voltage is 26V, rated line voltage is 36V, rated frequency of 400Hz static inverter may refer to. This standard applies to all kinds of electronic equipment used in stationary power inverter, is a product development, production and acceptance of the main technical basis, but also the development of relevant product specifications and other technical documents shall follow the principles and foundations.

Document data

Chinese classification (CCS): L89.

Estimated length of the Chinese original: 32,376 words.
