What this standard covers

This standard specifies requirements for PCB product detail recording format, which is designed to meet the relevant PCB products processing, manufacturing and testing requirements have been made. These formats can be used in the printed circuit board between the designers and manufacturers of data transfer. When manufacturing cycle includes computer-aided processing and CNC machine link is also useful. Information can be done manually and digital interpreted in two ways, the data can also be used with the British public and the production unit.

Document data

International classification (ICS): 31.180.

Chinese classification (CCS): L30.

Estimated length of the Chinese original: 82,825 words.
