What this standard covers

This standard specifies the bell-type high-temperature sintering furnace technical requirements, quality assurance requirements and delivery preparations. This standard applies to the following uses of Bell furnace: in the natural atmosphere or in a protective atmosphere heat treatment of materials, such as: magnetic materials, electronic ceramics, functional ceramics sintering. Similar equipment in other industries can refer to this specification.

Document data

International classification (ICS): 77.180.

Chinese classification (CCS): H91.

Estimated length of the Chinese original: 12,121 words.
