What this standard covers

This standard specifies the CA35N type modular non-solid electrolyte tantalum capacitors (hereinafter referred to as capacitor) structure, dimensions, technical requirements and test methods. This standard applies to the insulating layer with a metal shell, metal cover solder sealed sintered tantalum anode polarity, radial (or axial) leads, multiple screw fixation combined non-solid electrolyte tantalum capacitors.

Document data

International classification (ICS): 31.060.40.

Chinese classification (CCS): L11.

Estimated length of the Chinese original: 18,111 words.
