What this standard covers

This standard specifies the general requirements and test methods for electronic vacuum resistance furnace (hereinafter referred to as "vacuum furnace") tests. This standard applies to components for electronic products, welding materials, degassing, annealing, sintering process requires a vacuum furnace. This standard does not apply to the diffusion furnace, single crystal furnace, and other special vacuum furnace.

Document data

Chinese classification (CCS): K61.

Estimated length of the Chinese original: 8,874 words.
