What this standard covers

This standard specifies the use of aluminum foil in copper, iron, zinc, manganese and magnesium determination electrolytic capacitors. This standard applies to the following content in the range of electrolytic capacitor with aluminum foil; copper content: 0. 0005 to 0. 2000%; iron content: 0. 001 to 0. 200%; Zn

Document data

International classification (ICS): 31.06.

Chinese classification (CCS): L11;L90.

Estimated length of the Chinese original: 6,655 words.
