What this standard covers

This standard specifies the use of chemical spectroscopy determination of lead, bismuth, zinc, cadmium, iron, magnesium, aluminum, tin and antimony, silver-copper solder apply. Determination of the range of 0. 0005% to 0. 01%.

Document data

Chinese classification (CCS): L90.

Estimated length of the Chinese original: 4,439 words.

Supersedes the earlier edition GB 9620.2-1988.
