What this standard covers

This standard specifies the microwave magnetron permanent ferrite magnets (hereinafter referred to as "magnet") classification, requirements, quality assessment procedures, Blank detail specification, and from the general specification GB/T 12796-1991 "permanent magnet oxygen Total body magnet norms "is selected for the pilot project detailed specifications and test methods. This specification applies to microwave magnetron permanent ferrite magnets, detail specification shall be prepared in accordance with the specification and shall comply with the appropriate blank detail specification.

Document data

International classification (ICS): 29.100.10.

Chinese classification (CCS): L19.

Estimated length of the Chinese original: 8,866 words.
