What this standard covers

This standard specifies the scope of the mine varistors can be used as the primary protection lightning surge protection devices. This standard provides a varistor lightning protection rating, the priority value, features, and quality assessment procedures, and added the relevant terminology, test and measurement methods. This standard applies to DC power or frequency is not higher than 400 Hz AC power to protect electronic equipment or other sensitive equipment against lightning surges from lightning damage varistors. Detailed specification referenced in this standard specifies test severities and requirements shall have the same or higher level of performance, not lower performance levels.

Document data

International classification (ICS): 31.040.30.

Chinese classification (CCS): L15.

Estimated length of the Chinese original: 17,164 words.

Adopted international standard: IEC 61312.3-1996, NEQ; IEC 61643.1-1998, NEQ.
