What this standard covers

This standard provides a standardized PCB connectors, the type test requirements and quality assessment procedures. This section includes all the test methods and procedures for, severity, dimensions and characteristics preferred value is selected. This standard specifies the development of electronic and electrical equipment with PCB connectors with assessed quality guidelines detailed specifications. This part should GB/T 18501. 1-2001 general specification and the relevant detail specification together.

Document data

International classification (ICS): 31.220.10.

Chinese classification (CCS): L23.

Estimated length of the Chinese original: 21,226 words.

Adopted international standard: IEC 61076-4-1995, IDT.
