**INDUSTRY STANDARD OF THE
PEOPLE'S REPUBLIC OF CHINA**

SJ/T 11371-2007

**Sectional specification for piezoelectric ceramic transformer of
assessed quality for use in electronic equipment for capability
approval**

按能力批准程序评定质量的电子设备用压电陶瓷变压器分规范

(English Translation)

Issued on: November 9, 2007

Implemented on: January 20, 2008

Issued by: Ministry of Industry and Information Technology

What this standard covers

This standard specifies the Press GB/T 14860-1993 capability approval procedure stipulated the release of the piezoelectric ceramic transformer method of preparation of detail specifications. This specification covers Blank detail specification (BDS), Blank detail specification and provides a format suitable for this type of component testing, and eventually elected to the test pilot project is funded by the specification of the decision makers. This specification also provides the corresponding ratings and characteristics. The specification elements are mainly used backlight power supply, high voltage power supply, negative ion generator, laptop computers, DVD/VCD, digital cameras, large-screen LCD TVs and other electronic equipment used in piezoelectric ceramic transformer.

Document data

International classification (ICS): 29.100.10.

Chinese classification (CCS): L17.

Estimated length of the Chinese original: 16,159 words.
