### What this standard covers

This standard specifies the requirements for insulation resistance tester, test methods, inspection rules, packaging, labeling, transportation and storage. This specification is used in the AC mains or battery powered, rated output voltage is not higher than the pointer indicates 10KV and digital insulation resistance tester instructions, as well as safety performance tester and voltage insulation tester insulation resistance of parts. This specification does not apply to high insulation resistance tester (megger).

### Document data

International classification (ICS): 17.220.

Chinese classification (CCS): L88.

Estimated length of the Chinese original: 14,195 words.
