What this standard covers

This standard applies to lithium niobate integrated optical device (hereinafter referred to as "device") required quality assessment procedures, inspection requirements, screening, content sampling requirements, test and measurement methods. This instruction applies to lithium niobate modulator strength of materials, phase modulators, optical switches and Y waveguide phase modulator for fiber optic gyro, etc., by a lithium tantalate materials integrated optical devices with similar functions may be implemented by reference.

Document data

International classification (ICS): 33.180.

Chinese classification (CCS): M33.

Estimated length of the Chinese original: 16,173 words.
