What this standard covers

This standard specifies the energy consumption grade index, comparable unit consumption calculation method and evaluation rules for diffusion furnaces. This standard applies to diffusion furnaces used in diffusion/oxidation, annealing and alloying processes with working temperatures ranging from 400°C to 1350°C.

Document data

International classification (ICS): 31.550.

Chinese classification (CCS): L01.

Estimated length of the Chinese original: 13,177 words.
