### What this standard covers

This standard specifies the technical requirements for color matrix liquid crystal display (LCD) modules used in portable computers, as well as detailed requirements for quality assessment procedures, inspection and test methods, packaging, transportation, and storage. It applies to the production, design, and delivery of color matrix LCD modules with edge-lit backlighting for portable computers; modules using mini-LED backlighting may refer to this standard.

### Document data

International classification (ICS): 31.120.

Chinese classification (CCS): L53.

Estimated length of the Chinese original: 26,288 words.
