What this standard covers

This standard specifies the efficiency requirements for LED modules to convert electrical energy into light energy. The main contents include integrated LED modules, semi-integrated LED modules, and non-integrated LED modules, which are divided into 5 according to power, correlated color temperature and color rendering index. Level indicator requirements and corresponding test methods.

Document data

Chinese classification (CCS): L45.

Estimated length of the Chinese original: 6,691 words.
