What this standard covers

This standard specifies the technical requirements, test methods and requirements for the use of anti-static packaging for electronic products. This standard applies to antistatic packaging involved in the production, storage, transportation turnover and use of static sensitive products. This standard does not apply to packaging used in electromagnetic interference / radio frequency interference / electromagnetic pulse environment, nor to packaging used in combustion and explosion hazardous environments.

Document data

Chinese classification (CCS): L06.

Estimated length of the Chinese original: 11,171 words.
