What this standard covers

This standard specifies the structure, grammar, and RFID-based domain name for products and services based on RFID technology between the domain name of the product and service and the Internet and the decimal network and network address (mainly IP address). The mapping mechanism also specifies the implementation requirements for the domain name specification for products and services based on radio frequency identification tags.

Document data

Chinese classification (CCS): L71.

Estimated length of the Chinese original: 10,187 words.
