What this standard covers

This standard specifies the functions, performance, test methods, inspection rules, marking, packaging, transportation, storage and transportation requirements of stereo digital camera equipment. Applicable to devices with stereo digital imaging capabilities, including stereo digital camera devices using dual optical imaging technology and stereoscopic digital devices for other imaging technologies. However, it does not apply to professional broadcast stereo digital devices.

Document data

Chinese classification (CCS): M71.

Estimated length of the Chinese original: 28,299 words.
