What this standard covers

This standard specifies the measurement conditions and measurement methods for the stereoscopic image quality of a naked-eye stereoscopic television without wearing stereo glasses as an auxiliary device. Applicable to naked-eye stereoscopic TV, naked-eye stereoscopic display and other naked-eye stereoscopic display terminals can be used for reference. Not applicable to eye tracking naked-eye stereo display terminals. This standard applies to the air interface of the 800MHz/2GHz cdma2000 digital cellular mobile communication system.
