What this standard covers

This standard specifies the method for determining the rate of chemical emissions emitted by the equipment under test in the process of information and communication technology (ICT) and consumer electronics (CE) equipment performing its intended function in an Emission Test Box (ETC). These methods include preparation, sampling (or monitoring) within controlled ETCs, custody and analysis, calculation of emission rates, and reporting.

Document data

Chinese classification (CCS): L63.

Estimated length of the Chinese original: 44,481 words.

Adopted international standard: ISO/IEC 28360:2012, IDT.
