What this standard covers

This standard specifies the acceptance classification and acceptance basis. In order to ensure that the supply and demand sides have determined that the business specified in the contract has been fulfilled, three major types of milestone acceptance activities, including acceptance of goods, preliminary acceptance, and completion acceptance, are defined. The acceptance planning and implementation process is defined, including: acceptance planning, acceptance and implementation. In the acceptance and implementation section, the acceptance conditions, acceptance preparation and acceptance process were clearly defined for the three types of acceptance activities: acceptance inspection, preliminary acceptance, and completion acceptance. This standard applies to service providers designing and delivering service products, the acquirer managing the content delivered by the supplier, and as the basis for the purchaser to select and evaluate the supplier.
