What this standard covers

This standard specifies the requirements, test methods, inspection rules, marking, packaging, transportation and storage of the backsheet for photovoltaic module packaging. The technical requirements mainly include thickness deviation, heat shrinkage rate, water vapor transmission rate, mechanical properties, matching performance, electrical properties, aging properties (UV, damp heat, heat cycle, wet freezing, pressure cooking), corrosion resistance, opening cracks. Elongation. This standard applies to thermally conductive composite base copper clad plates with a thickness of 0.6mm~2.0mm.

Document data

Chinese classification (CCS): L90.

Estimated length of the Chinese original: 26,273 words.
