### What this standard covers

This standard specifies the requirements, test methods, inspection rules, marking, packaging and storage of electrolytes for lithium primary batteries (lithium-manganese dioxide, lithium-ferrous ferrous sulfide, lithium-fluorinated carbon polymer systems). Among them, technical indicators include color, moisture, density (20° C), electrical conductivity (20° C), metal impurity content, sulfate ion and chloride ion content.

### Document data

International classification (ICS): 31.030.

Chinese classification (CCS): L90.

Estimated length of the Chinese original: 8,895 words.
