What this standard covers

This standard specifies the terms and definitions, product classification and specifications, requirements, inspection methods, inspection rules, marking, packaging, transportation and storage of multi-wire cutting machines for semiconductor materials. This standard applies to multi-wire cutting machines for cutting monocrystalline silicon, polycrystalline silicon, germanium and sapphire and other hard and brittle semiconductor materials. This standard applies to vacuum generators with compressed air as the working medium, which can be divided into pressure type and flow type according to the type of nozzle.
