What this standard covers

This standard specifies the principles, methods, index system and requirements, procedures and reports for green factory evaluation in printer and multi-function machine manufacturing industries. This standard is applicable to the evaluation of factories with the actual production process of printers and multi-functional all-in-one products. Products include laser printers, inkjet printers, thermal printers, dot matrix printers with A4 and A3 paper formats and a maximum printing speed of less than or equal to 70 pages per minute, and digital multi-functional all-in-one machines with printing as the basic function; Other electrostatic imaging equipment, inkjet imaging equipment, thermal imaging equipment, and other production plants of similar products can refer to it.
