What this standard covers

This standard specifies the green design product evaluation methods, evaluation requirements and product life cycle evaluation report preparation methods for projection display products. This standard applies to liquid crystal displays (LCDs) with projection as the main function, including but not limited to high-pressure mercury lamps, light-emitting diodes (LEDs) or metal halide as light sources, digital optical processing (DLP), solid-state light source projectors and silicon-based Projectors based on liquid crystal (LCOS) as display devices; also suitable for projection products and laser TV products whose main function is projection display and can play radio and television programs or Internet television programs. The green design product evaluation of other types of projection display products can be implemented as a reference. This standard does not apply to professional projectors for cinema screenings.
