What this standard covers

This standard specifies the technical requirements and test methods for 4K ultra-high definition monitors (hereinafter referred to as 4K monitors). This document applies to broadcast-grade professional technical monitoring monitors and content monitoring monitors used in the shooting, on-site application, post-production, and broadcasting of 4K ultra-high definition high dynamic range television broadcast programs, movies, advertisements, online videos, and IPTV. Monitors for other purposes may refer to this document. This document applies to the research, development, production, acceptance, evaluation, and operational calibration of 4K monitors.
