What this standard covers

This standard specifies the photoelectric performance requirements, interface requirements, and functional requirements of e-sports display products, and describes the corresponding measurement methods. This standard is applicable to the design, production, and evaluation of e-sports displays based on liquid crystal display technology. E-sports monitors using other display technologies can be used as a reference.

Document data

International classification (ICS): 33.160.50.

Chinese classification (CCS): M70.

Estimated length of the Chinese original: 19,117 words.
