What this standard covers

This standard specifies the functional index requirements, performance index requirements and corresponding test methods for deep learning chips for cloud-side reasoning (including chip modules, accelerator cards, etc.). This standard is applicable to the design, procurement, and evaluation of deep learning chips for cloud-side reasoning by chip manufacturers, application manufacturers, and third-party organizations.

Document data

International classification (ICS): 31.200.

Chinese classification (CCS): L56.

Estimated length of the Chinese original: 21,243 words.
