Foreword

SJ/T 12115-2026 is a recommended industry standard of the People's Republic of China in the Electronics sector, approved and issued by the Ministry of Industry and Information Technology on 28 April 2026, with effect from 1 August 2026.

Classification: ICS 35.020; CCS L70.

1 Scope

This standard specifies the system for model collaboration between terminal devices and the cloud, a key technology of artificial intelligence. In such an arrangement, AI models run partly on end-user devices and partly in cloud services and work together, and the document gives the system specification for that cooperation.

Model and platform developers, device makers, cloud service providers and system integrators can use it as a technical basis. The standard is voluntary, as the /T in its code shows. It was approved by the Ministry of Industry and Information Technology, issued on 28 April 2026 and takes effect on 1 August 2026. It is a new standard.
