What this standard covers

This standard specifies the important dimensions of the preferred series of RM-type cores and low-profile RM-type cores made of ferrite and mechanical interchangeability, as well as the core bottom profile on a 2.54mm printed circuit board grid. The position of the end of the coil bobbin. Test conditions and clamping forces for inductance measurements are also specified.

Document data

Chinese classification (CCS): L19.

Estimated length of the Chinese original: 22,255 words.

Adopted international standard: IEC 62317-4:2005, IDT.

Supersedes the earlier edition SJ/T 2744-2002.
