What this standard covers

This standard specifies the IC IP core (Intellectual Property Core, hereinafter referred to as IP) Transfer (IP from the supplier/creator to the user/integrator transfer) supplier/creator shall provide the necessary information about the user and the IP IP-delivered items. The purpose of this specification is to define and specify the necessary and sufficient information in order to simplify the process of selection of IP. This set of information should enable the user to correctly assess the applicability of the IP to be used and feasibility. This set of information should also be able to guide the user to successfully integrate the IP into their designs.

Document data

International classification (ICS): 31.200.

Chinese classification (CCS): L56.

Estimated length of the Chinese original: 21,241 words.
