What this standard covers

This standard specifies the performance validation prototype pump muddy water pump model using model test method muddy water. And as muddy water pump model acceptance test criteria. This standard applies to axial, Francis (oblique flow) and centrifugal (including multi-stage) pumps laboratory model of the sediment concentration does not exceed 50kg/m^3 of suspended sediment Muddy acceptance test. This standard is limited to the verification of muddy water pump performance indicators. Does not involve the pump structure, materials and other aspects of the problem, strength.

Document data

International classification (ICS): 23.080.

Chinese classification (CCS): J71.

Estimated length of the Chinese original: 23,250 words.

Supersedes the earlier edition SL 141-1997.
