What this standard covers

This standard applies to new or expanded unit capacity and above 10MW hydroelectric generating plants (excluding pumped storage power plants), AC rated voltage of 35 ~ 500kV substation, single most 200kW and above capacity pumping stations. This standard specifies the electrical measuring water conservancy and hydropower project (including energy metering) the basic principles of design, contents and requirements. Does not include related content laboratory tests of electrical instrumentation.

Document data

International classification (ICS): 27.140.

Chinese classification (CCS): P59.

Estimated length of the Chinese original: 60,688 words.

Supersedes the earlier edition SDJ 9-1987.
