What this standard covers

This standard specifies the classification, technical requirements, test methods, inspection rules, marking, packaging, transportation, storage and warranty period of concrete mixers for water conservancy and hydropower construction. This standard is applicable to the continuous mixer with a nominal capacity of 1000-9000L and a continuous mixer with a capacity of 600 cubic meters/h or less, which is matched with the large and medium-sized hydraulic concrete mixing plant (station). A periodic mixer with a nominal capacity of less than 1000 L can be used as reference.

Document data

International classification (ICS): 91.220.

Chinese classification (CCS): P98.

Estimated length of the Chinese original: 11,158 words.
