What this standard covers

This standard specifies the level of hydrological stations, traffic, water engineering degree requirements and assessment methods to assess the impact of sediment test subject, and in accordance with the area affected in varying degrees to provide water level observation, flow test, sediment testing methods, and integration of data instructions. This standard applies to the area affected is Hydrometry rivers, channels, lakes and reservoirs hydrological (water level) stations.

Document data

International classification (ICS): 07.060.

Chinese classification (CCS): A44.

Estimated length of the Chinese original: 11,151 words.
