What this standard covers

This standard stipulates the composition of urban flood response emergency plans, the overall plan for urban flood control and emergency response, the urban flood control and emergency response plan, and the contents and requirements of the urban flood control emergency response special plan. This standard is applicable to flood control headquarters of established cities at all levels to cope with flood disasters in urban areas and organize the compilation of urban flood prevention emergency plans. The flood prevention authorities of non-established towns may refer to the implementation.
