What this standard covers

This standard specifies the applicable conditions, overall requirements, system functions, system performance, electronic regulators, hydraulic parts, assembly and processes, test and acceptance, packaging, transportation and storage of small and medium-sized microcomputer turbine regulating systems. This standard is applicable to the design, manufacture, testing and acceptance of small and medium-sized microcomputer turbine regulating systems with a servomotor capacity of 75000Nμm and below.

Document data

International classification (ICS): 27.140.

Chinese classification (CCS): K55.

Estimated length of the Chinese original: 38,331 words.

Adopted international standard: IEC 61362-2012??NEQ; IEEE 1207-2017, NEQ.
