1 Foreword

SL/T 818-2023 was issued by Ministry of Water Resources of the People's Republic of China on 12 July 2023 and has been in force since 12 October 2023.

The SL/T prefix marks a recommended standard. It is not law in itself: it becomes binding when a contract names it, when a regulation or a mandatory standard refers to it, or when a producer declares conformity with it.

The document runs to 39 pages in English translation.

2 Scope Preview

This standard is applicable to the preparation of joint dispatching plans for flood control projects in large rivers, large lakes and their main tributary basins. Small and medium-sized rivers can be implemented as a reference.

SL/T 818-2023 falls under ICS 27.140, in the field of energy and heat transfer engineering.

This catalogue holds 23 other SL/T standards in that field.

In this catalogue, SL/T standards carry edition years from 1994 to 2026.

3 About this standard

Issued by: Ministry of Water Resources of the People's Republic of China

English translation: about 39 pages

Chinese original: about 58,592 characters

4 Related standards

Standards on related subjects:

NB 35047-2015 - Code for seismic design of hydraulic structures of hydropower projects

SL 314-2004 - Design specification for roller compacted concrete dams

SL 282-2003 - Design specification for concrete arch dams

SL/T 778-2019 - Shanhonggou flood control engineering technical specification

SL/T 165-2019 - Technical regulations for landslide surge simulation

SL/T 164-2019 - Regulation for simulation of dam-break flow

5 Classification and status

International classification (ICS): 27.140

Chinese Standard Classification (CCS): P 58

Prefix SL/T: recommended standard.
