### Foreword

This standard is drafted in accordance with the rules given in GB/T 1.1-2009 this standard replaces SN/T 1255-2007 (Basic Provisions for the Preparation of Technical Standards for Inspection and Quarantine of Entry and Exit Animals).

Compared with SN/T 1255-2007, the main technical changes except the editorial modification are as follows.

- Revised the normative reference file guide (see Chapter 2, Chapter 2 of the 2007 edition);
- Added "terms and definitions" (see Chapter 3);
- Modified the name of "Element Composition and Order" (see Chapter 5, Chapter 4 of the 2007 edition);
- Revised the preface of the informative overview elements, the introduction of the introduction (see 6.3, 6.4, 2007 version 5.3, 5.4);
- Revised the scope of normative general element standard scope, normative reference documents (see 7.2, 7.3, 2007 version 6.2, 6.3);
- Revised the expression of terms and definitions (see 8.1, 2007 version 7.1);
- Modified the names and expressions of "symbols, codes and abbreviations" (see 8.2, 2007 version 7.2);
- Revised the expression of quarantine methods (see 8.4.1, 2007 version 7.4.1);
- Revised the expression of the normative appendix (see 8.5, 2007 version 7.5).

This standard is proposed and managed by the National Certification and Accreditation Administration.

This standard was drafted. Sichuan Entry-Exit Inspection and Quarantine Bureau of the People's Republic of China, Liaoning Entry-Exit Inspection and Quarantine Bureau, Jiangsu Entry-Exit Inspection and Quarantine Bureau of the People's Republic of China.

## 1 Scope

This standard stipulates the basic requirements for the preparation of technical standards for inspection and quarantine of entry and exit animals, the composition of standards, the layout and preparation of articles.

Rules.

This standard applies to the preparation of technical standards for inspection and quarantine of entry and exit animals.

## 2 Normative references

The following documents are indispensable for the application of this document. For dated references, only dated versions apply to this article.

Pieces. For undated references, the latest edition (including all amendments) applies to this document.

GB/T 1.1-2009 Standardization work guide Part 1. Standard structure and preparation  
GB/T.20000.1 Standardization Work Guide Part 1. General terms for standardization and related activities  
GB/T.20000.2 Standardization Work Guide Part 2. Adopting International Standards  
GB/T.20000.3 Standardization Work Guide Part 3. Reference Documents

## 3 Terms and definitions

The following terms and definitions as defined in GB/T.20000.1 apply to this document. For ease of use, the following is repeated GB/T.20000.1 part of the terms and definitions.

Technical standard technical standards A standard that specifies technical requirements, either directly specifying technical requirements or specifying techniques by reference to standards, technical specifications, or procedures.

Requirements, or incorporate the content of technical specifications or procedures into the standard.

Normative general element general normative elements Describe the name and scope of the standard, and give the list of documents necessary for the standard use.

Normative technical element technical normative elements Elements that define the standard technical content.

Informative overview elements preliminary informative elements Mark the standard, introduce the content, explain the background, the development situation and the elements of the standard's relationship with other standards or documents.

Informative supplementary element supplementary informative elements Provides elements

that help to understand and use the standard.
